PUNTALE DI SICUREZZA / SAFETY TOE / EMBOUT DE SÉCURITÉ

COMPOSITO > Particolarmente leggero, garantisce protezione totale del piede ed elevato isolamento termico

COMPOSITE > Especially light, guarantees total foot protection and high thermic insulation

COMPOSITE > Particulièrement léger, garantit la protection totale du pied et une isolation thermique élevée

ALLUMINIO > Particolarmente leggero, garantisce protezione totale del piede ed maggiore flessibilità

ALUMINIUM > Especially light, guarantees total foot protection and greater flexibility

ALUMINIUM > Particulièrement léger, garantit la protection totale du pied et plus de flexibilité

ACCIAIO > Garantisce protezione totale del piede in caso di caduta di oggetti dall'alto

STEEL > Guarantees total foot protection against falling objects

ACIER > Garantit une protection totale du pied en cas de chute d'objets situés en hauteur

SOTTOPIEDE / INSOLE / SEMELLE DE PROPRETÉ

FIBRA SINTETICA > Costruita con fibra polimerica ad alta resistenza ed elevata flessibilità garantisce elevato isolamento termico, leggerezza e comfort. Totale protezione del piede dal rischio di ferite, tagli, punture

SYNTHETIC FIBRE > Made with polymer synthetic fiber hard wearing and extremely flexible, guarantees high thermic insulation, light weight and comfort. Total foot protection against injuries, cuts and punctures

FIBRE SYNTHÉTIQUE > Construite en fibre synthétique polymérique à haute résistance et flexibilité, garantit une isolation thermique élevée, légèreté et confort. Protection totale du pied contre les risques de blessures, coupures, piqûres

ACCIAIO > Lamina in acciaio inox ad alta durezza, assicura elevata resistenza nel caso di contatto con materiali appuntiti. Totale protezione del piede dal rischio di ferite, tagli, punture

STEEL > Extra durable perforation stainless steel plate, guarantees high resistance and protection against sharp objects. Total foot protection against injuries, cuts and punctures

ACIER > Bande anti-perforation en acier inox à haute dureté, assure résistance élevée en cas de contact avec des matériaux pointus. Protection totale du pied contre les risques de blessures, coupures, piqûres

SUOLA / SOLE / SEMELLE

PRESTAZIONI D'ECCELLENZA PER SCARPE SENZA CONFRONTO.

EXCELLENT PERFORMANCES FOR PEERLESS SHOES.

PRESTATIONS D'EXCELLENCE POUR DES CHAUSSURES UNIQUES.

SUOLA ANTISTATICA

Calzature marcate S1-S2-S3 possiedono proprietà antistatiche. Permettono il passaggio di correnti a basso voltaggio, scaricando così le scariche elettrostatiche accumulate dall'operatore.

ANTISTATIC SOLE

Work shoes marked S1-S2-S3 have anti-static properties. They permit low voltage current passage, thus discharging the electrostatic loads accumulated by the operator.

SEMELLE ANTISTATIQUE

Les chaussures de travail marquées S1-S2-S3 possèdent des propriétés antistatiques. Elles permettent le passage de courants de faible voltage en déchargeant les charges électrostatiques accumulées par l'opérateur.

SUOLA RESISTENTE AGLI ACIDI

Test eseguito con immersione della suola in una soluzione acida e successiva verifica dell'aumento di volume. La suola Acid-Resistance non è attaccabile dagli acidi e mantiene invariate caratteristiche e prestazioni.

ACID-RESISTANT SOLE

The tests involves immersing a sole in an acid solution and then checking for any increase in volume. An acid resistant sole can not be attacked by acid and maintains its characteristics and performances.

SEMELLE RÉSISTANTE AUX ACIDES

L'essai effectué prévoit l'immersion d'un échantillon de semelle dans une solution acide et la vérification de l'augmentation du volume à la fin de l'essai. Une semelle résistante aux acides n'est pas attaquable dans le temps ses caractéristiques et performances.

TOMAIA RESISTENTE ALL'ACQUA

Grazie ad uno speciale trattamento la tomaia è impermeabile all'acqua. Test eseguito con immersione della calzatura in un bagno d'acqua dopo aver introdotto aria compressa. L'assenza di bolle d'aria indica la tenuta all'acqua della tomaia.

WATER-RESISTANT UPPER

Thanks to a special treatment the uppers are waterproof. The test is performed by sealing the shoe and by immersing it in a water bath after introducing compressed air. Lack of air bubbles indicates that the upper is waterproof.

TIGE RÉSISTANTE À L'EAU

Grâce à un traitement special la tige est imperméable à l'eau. L'essai est effectué en isolant la chaussure et en la plongeant dans un bain d'eau après y avoir introduit de l'air comprimé. L'absence de bulles d'air indique que la tige est imperméable à l'eau.

SCARPA RESISTENTE ALL'ACQUA

Scarpe dotate di membrana impermeabile che blocca la penetrazione dell'acqua. Test eseguito con immersione totale della calzatura nell'acqua. Alla fine del test la superficie bagnata all'interno deve essere < 3 cm².

WATER RESISTANT SHOES

Shoes equipped with waterproof membrane that blocks the water penetration. The test is performed with the sailing of the total shoe into the water. At the end the wet surface must be < 3cm².

CHAUSSURE RÉSISTANTE À L'EAU

Chaussures munies d'une membrane imperméable qui bloque la pénétration de l'eau. L'essai est effectué avec immersion totale de la chaussure dans l'eau. A la fin de l'essai la surface humide à l'intérieur doit être < 3 cm².

SUOLA RESISTENTE AGLI OLII

Suole che respingono e non assorbono sostanze oleose mantenendo invariate caratteristiche e prestazioni. Test eseguito con immersione nel Trimetipentano. Il volume non deve aumentare oltre il 12%.

OIL-RESISTANT SOLE

Soles that repel and do not absorb oily substances, and maintain their characteristics and performances. The test is performed by an immersion in Trimethylpentane. The volume must not increase more than 12%.

SEMELLE RÉSISTANTE AUX HUILES

Semelles qui repoussent et n'absorbent pas substances huileuses en gardant inchangées leurs caractéristiques et performances. L'essai prévoit l'immersion dans Triméthylpentane. Le volume ne doit pas excéder le 12%.

**SUOLA RESISTENTE AL CALORE**

Suole resistenti al calore per contatto. Il test prevede il contatto con superficie a 300°C per 60 sec. senza danni conseguenti visibili.

HEAT-RESISTANT SOLE

Soles that are resistant to heat contact. The test involves contact with a hot surface of 300°C for 60 seconds. without visible damages.

SEMELLE RÉSISTANTE À LA CHALEUR

Semelles résistantes à la chaleur par contact. L'essai prévoit le contact avec une surface à 300°C pendant 60 secondes, sans aucun dommage.

**SUOLA ISOLANTE DAL FREDDO**

Scarpe con soles isolanti dal freddo. Sottoposte a test specifico a -17° con verifica che la temperatura della superficie interna non risulti inferiore agli standard richiesti. Specifiche per lavori all'esterno con esposizione ad agenti atmosferici a bassa temperatura.

COLD INSULATING SOLE

Shoes with insulating soles against the cold. Subjected to a specific test at -17 ° with verification that the temperature of the internal surface is not lower than the required standards. Specific for outdoor work with exposure to atmospheric agents at low temperature.

SEMELLE ISOLANTE DU FROID

Chaussures à semelles isolantes du froid. Soumises à un test spécifique à -17 ° C, avec vérification que la température de la surface interne n'est pas inférieure aux normes requises. Spécifiques pour les travaux extérieurs avec exposition aux agents atmosphériques à basse température.

**ESD - ELECTROSTATIC DISCHARGE**

Scarpe che scaricano costantemente al suolo l'elettricità statica accumulata dal corpo umano proteggendo anche gli apparecchi sensibili alle scariche elettrostatiche.

ESD - ELECTROSTATIC DISCHARGE

Shoes that constantly discharge the static electricity accumulated by the human body to the ground, also protecting devices that are sensitive to electrostatic discharge.

ESD - ELECTROSTATIC DISCHARGE

Une chaussure qui décharge constamment l'électricité statique accumulée par le corps humain sur le sol, en protégeant également les appareils sensibles aux décharges électrostatiques.

**METAL FREE**

Scarpa totalmente costruita senza parti metalliche.

METAL FREE

Shoe totally designed without metal parts.

SANS MÉTAL

Chaussure totalement construite sans pièces métalliques.

SCARPE DI SICUREZZA: NORME EUROPEE.

SAFETY SHOES: EUROPEAN
STANDARDS.
CHAUSSURES DE SÉCURITÉ:
NORMES EUROPÉENNES.

NORMA EUROPEA CE-EN ISO 20345:2011 / EUROPEAN STANDARD EC-EN ISO 20345:2011 / NORME EUROPÉENNE CE-EN ISO 20345:2011

Le scarpe di sicurezza a norma CE EN ISO 20345:2011 sono contraddistinte da una lettera S (Dall'inglese Safety= Sicurezza). La scarpa "di base", marcata con le lettere SB (S=sicurezza e B=base) deve avere i seguenti requisiti minimi relativamente a:

- **Tomaia:** altezza, spessore, resistenza allo strappo, flessibilità, permeabilità al vapore
- **Puntale:** resistenza a compressione, lunghezza minima, base portante minima
- **Suola:** spessore, resistenza allo strappo, all'abrasione, alla flessione e alla resistenza al distacco tomaia/suola
- **Fodera:** spessore, resistenza allo strappo e all'abrasione
- **Sottopiede:** spessore, resistenza all'abrasione

The EC-EN ISO 20345:2004 standard safety shoes are marked with an S (Safety). The "base" shoe, marked with letters SB (S = safety and B = base) must have the following minimum requirements concerning:

- **Upper:** height, thickness, tear-resistance, flexion-resistance and steam-proof
- **Toe:** resistance to compression, minimum length, minimum base capacity
- **Sole:** thickness, tear-resistance, abrasion-resistance, flexion resistance and upper/sole separation resistance
- **Lining:** thickness, tear-resistance and abrasion resistance
- **Insole:** thickness, abrasion resistance

Les chaussures de sécurité conformes à la norme CE EN ISO 20345:2011 sont marquées de la lettre S (de l'anglais Safety = Sécurité). La chaussure 'de base', marquée des lettres SB (S = sécurité et B = base) doit avoir les prescriptions minimales suivantes relativement à:

- **Tige:** hauteur, épaisseur, résistance à la déchirure, flexibilité, perméabilité à la vapeur
- **Embout:** résistance à la compression, longueur minimum, base portante minimum
- **Semelle:** épaisseur, résistance à la déchirure, à l'abrasion, au fléchissement et résistance au détachement tige/semelle
- **Doublure:** épaisseur, résistance à la déchirure et à l'abrasion
- **Première:** épaisseur, résistance à l'abrasion

La classificazione prevede i seguenti livelli:

SB	requisiti di base
S1	SB + A + E
S2	S1+WRU
S3	S2+P

The classification includes the following levels:

SB	basic requirements
S1	SB + A + E
S2	S1+WRU
S3	S2+P

La classification prévoit les niveaux suivants:

SB	prescriptions de base
S1	SB + A + E
S2	S1+WRU
S3	S2+P

Le calzature con requisiti supplementari dovranno portare indicate le seguenti lettere di identificazione:

Shoes with supplementary requirements may be marked with the following identification letters.

Le calzature con requisiti supplementari dovranno portare indicate le seguenti lettere di identificazione:

		SB OB	S1 O1	S2 O2	S3 O3
A	CALZATURA ANTISTATICA / ANTISTATIC FOOTWEAR / CHAUSSURE ANTISTATIQUE	-	•	•	•

CI	ISOLAMENTO DAL FREDDO / COLD INSULATION / ISOLATION DU FROID	-	-	-	-

• **Requisiti richiesti** / Required specifications / Prescriptions demandées

- **Requisiti non obbligatori, controllare la timbratura della calzatura** / Specifications which are not compulsory, check the marking on the shoe / Prescriptions non obligatoires, vérifier le griffage de la chaussure

Dall'Aprile 2008 (norma EN ISO 20345:2007:A1) le scarpe di sicurezza, per poter essere certificate, devono avere una resistenza allo scivolamento almeno pari ai valori minimi riportati nella tabella.

La prova effettuata dall'ente certificatore consiste nell'appoggiare la scarpa su un piano di riferimento (ceramica con soluzione detergente per SRA o acciaio con glicerina per SRB) applicando alla stessa un carico (40 kg. per taglie fino a 42 - 50 Kg da taglia 43) facendo scorrere il piano mantenendo ferma la scarpa. Il numero ottenuto rappresenta il coefficiente di attrito cioè la resistenza allo scivolamento. La prova viene ripetuta per valutare la resistenza sul tacco inclinando la calzatura di 7°.

Since April 2008 (in compliance with UNI EN ISO 20345:2007:A1) the level of slip resistance on safety work shoes must be at least equal to the minimum values indicated in the table.

The test performed by the Certification Body consists in placing the shoe on a reference surface (ceramic with detergent solution for SRA or steel with glycerine for SRB) and applying a load (40 kg. for sizes up to 42 - 50 Kg for sizes from 43 upwards), moving the test surface while holding the shoe still. The number obtained represents the friction coefficient, i.e. the level of slip resistance. The test is repeated to assess the resistance on the heel by tilting the shoe by 7 degrees.

À partir d'Avril 2008 (norme EN ISO 20345:2007:A1) les chaussures de sécurité, pour être certifiées, elles doivent avoir une résistance au glissement au moins égale aux valeurs minimales indiquées dans le tableau.

L'essai effectué par l'organisme de certification consiste à: en plaçant la chaussure sur un plan de référence (céramique avec solution détergente pour SRA ou acier avec glycérine pour SRB) et en appliquant une charge (40 kg. pour les tailles jusqu'à 42 - 50 kg à partir de la taille 43) en déplaçant la surface d'essai tout en maintenant la chaussure immobile. Le nombre obtenu représente le coefficient de frottement, c'est à dire la résistance au glissement. L'essai est répété pour évaluer la résistance sur le talon en inclinant la chaussure de 7°.

SRC (= SRA+SRB) - RESISTENZA ALLO SCIVOLAMENTO DI TIPO C (EN ISO 20345:AMD1)

SRC (= SRA+SRB) - TYPE C SLIP RESISTANCE (EC-EN ISO 20345:AMD1)

SRC (= SRA+SRB) - RÉSISTANCE AU GLISSEMENT DU TYPE C (CE-EN ISO 20345:AMD1)

SRA ceramica + soluzione detergente ceramic + detergent solution céramique + solution détergente		SRB acciaio + glicerina steel + glycerine acier + glycérine

DUO SPRAY

*Con Kapriol solo il meglio, ogni giorno!
A good daily habit!
De bonnes habitudes quotidiennes!*

CURA E MANUTENZIONE ALLUNGANO LA VITA DELLE TUE SCARPE KAPRIOL.

IT

Le scarpe di sicurezza usate durante la quotidiana attività lavorativa devono essere considerate come degli accessori tecnici a tutti gli effetti. È quindi indispensabile dedicare attenzione alla cura e alla pulizia delle scarpe, considerando che esse vengono utilizzate più di 8 ore al giorno, per almeno 5 giorni lavorativi alla settimana. Una scarpa da lavoro dura in media 5-6 mesi. Non effettuando alcuna operazione di cura/manutenzione, tale arco temporale potrebbe ridursi sensibilmente. Al contrario, una corretta e costante opera di pulizia allunga la vita della calzatura, accrescendo al tempo stesso il comfort per chi la utilizza. Al termine della giornata lavorativa, o almeno una volta alla settimana, si consiglia vivamente di effettuare le seguenti operazioni:

- Rimuovere sporco e fango dalla tomaia con acqua tiepida e sapone neutro, usando uno

straccio umido o una semplice spazzola

- Rimuovere sempre il sottopiede dalla calzatura, lavarlo e farlo asciugare come fatto per la tomaia
- Lasciare asciugare la scarpa a temperatura ambiente possibilmente in luogo ventilato, facendo attenzione a non posizionarle vicino a fonti di calore artificiali quali stufe, luce diretta del sole, per evitare screpolature e rotture dei pellami naturali.
- Una volta asciugata, la tomaia può essere trattata con uno spray idrorepellente per garantire la protezione dallo sporco e dall'umidità. Nel caso di calzature in pelle sintetica, è sufficiente applicare una schiuma leggera per la pulizia: tale materiale, infatti, non è adatto ad essere trattato con spray idrorepellenti, che provocherebbero solo uno strato appiccicoso in superficie.

CARE AND MAINTENANCE PROLONG LIFE.

EN

Safety shoes worn daily during work must be considered as technical accessories for all intents and purposes. It is thus essential to dedicate attention to caring for and cleaning shoes, considering that they are used for more than 8 hours a day, at least 5 days a week. On average, a work shoe lasts 5-6 months. Without care/maintenance, this time period could be significantly reduced. Contrarily, correct and constant cleaning extends shoe life, also improving the user's comfort. At the end of the work day, or at least once a week, we highly recommend you perform the following operations:

- Remove dirt and mud from the upper with warm water and neutral soap, using a damp

cloth or simple brush

- Always remove the insole from the shoe, wash it and dry it as done for the upper
- Let the shoe dry at room temperature, possibly in a ventilated area, being careful not to place it too close to artificial heat sources such as stoves, direct sunlight, to prevent the natural leather from wrinkling and breaking
- Once dry, the upper can be treated with waterproofing spray to guarantee protection against dirt and humidity. For synthetic leather shoes, simply apply a light foam to clean: in fact, this material is not suited for waterproofing spray treatment which would only create a sticky film on the surface

SOIN ET ENTRETIEN ALLONGENT LA VIE.

FR

Les chaussures de sécurité utilisées durant l'activité de travail quotidien doivent être considérées comme des accessoires techniques à tous les effets. Il est donc indispensable de bien entretenir les chaussures compte tenu du fait qu'elles sont utilisées plus de 8 heures par jours et 5 jours par semaine. Une chaussure de travail dure en moyenne 5-6 mois. Si aucune opération d'entretien/soin n'est effectuée, ce délai de temps pourrait sensiblement se réduire. En revanche, un bon entretien des chaussures allonge leur durée de vie et accroît en même temps le confort de ceux qui les portent. À la fin d'une journée de travail, ou au moins une fois par semaine, on conseille vivement d'effectuer les opérations suivantes:

- Enlever la saleté et la boue de la tige avec de l'eau tiède et du savon neutre à l'aide d'un

chiffon humide ou une simple brosse

- Toujours enlever la première des chaussures, la laver et la faire sécher comme pour la tige
- Laisser sécher les chaussures à température ambiante, si possible dans un endroit aéré, en veillant à ne pas les positionner près de sources de chaleur artificielles (telles que les poêles) et à la lumière directe du soleil, afin d'empêcher que les peaux naturelles ne se craquèlent ou ne se cassent.
- Une fois séchée, la tige peut être traitée avec un spray hydrofuge pour garantir la protection contre la saleté et l'humidité. Pour les chaussures en peau synthétique, il suffit d'appliquer une mousse d'entretien légère : les peaux synthétiques ne doivent en effet pas être traitées avec des spray hydrofuges car cela ne ferait que provoquer une couche poisseuse sur la surface.

VESTIBILITÀ / FITTING / PORTABILITÀ

SLIM FIT

Nella versione SLIM FIT la gamba è tenuta più aderente al corpo, riducendo la larghezza del ginocchio e del fondo e contenendo la lunghezza per ottenere un'aspetto più sagomato. Rimane l'ottima libertà dei movimenti grazie alla sagomatura del cavallo e delle ginocchia.

In the SLIM FIT version, the leg is more form-fitting, reducing the width of the knee and cuff and limiting the length to obtain a more shapely look. Excellent freedom of movement is still guaranteed thanks to the shape of the crotch and knee.

Dans la version SLIM FIT, la jambe adhère davantage au corps, en réduisant la largeur du genou et du bas et contenant la longueur pour obtenir un aspect plus façonné. Les mouvements sont libres grâce au façonnage du cheval et des genoux.

REGULAR FIT

La versione REGULAR FIT è la vestibilità standard Kapriol, adatta ad ogni tipo di utilizzo. La calzata è piacevole, il cavallo sagomato impedisce l'abbassamento del pantalone nei piegamenti, il maggiore spazio sulla gamba favorisce la massima libertà.

The REGULAR FIT version is the standard Kapriol fit, suited for every type of use. The fit is pleasant, the shaped crotch prevents pants from lowering when bending and the large space on the leg promotes maximum freedom.

La version REGULAR FIT est la portabilité standard Kapriol, adaptée à chaque type d'utilisation. La portabilité est confortable, le cheval façonné empêche l'abaissement du pantalon au moment où on se penche, le fait d'avoir plus d'espace sur la jambe favorise la plus grande liberté de mouvement.

RELAXED FIT

Nella versione RELAXED FIT viene dato maggiore volume a bacino, coscia, ginocchia e fondo, ottenendo una gamba più diritta, adatta ai lavori che richiedono il massimo dei movimenti. Grazie alla migliore ventilazione, è anche particolarmente indicata per la stagione estiva.

In the RELAXED FIT version, higher volume is given to the hips, thighs, knee and cuff to obtain a straighter leg, suited for work that requires maximum movement. Thanks to the improved ventilation, it is also especially indicated for summer.

Dans la version RELAXED FIT, on donne plus de volume au bassin, à la cuisse, aux genoux et au bas, obtenant une jambe plus droite, adaptée aux travaux qui exigent le maximum de mouvements. Grâce à une meilleure aération, cette version est particulièrement indiquée pour l'été.

VESTIBILITÀ, MATERIALI E DETTAGLI PER PERFORMANCES D'ECCELLENZA.

FIT, MATERIALS AND DETAILS FOR EXCELLENT PERFORMANCE.

PORTABILITÉ, MATÉRIAUX ET DÉTAILS POUR DES PERFORMANCES EXCELLENTES.

RESISTENZA ALL'USURA

Tessuti in grado di resistere all'esposizione prolungata a polvere, sfregamenti, lavaggi. Cuciture rinforzate e applicazioni di protezione.

WEAR RESISTANCE

Fabrics able to resist prolonged exposure to dust, abrasion and washing. Reinforced seams and protective applications.

RÉSISTANCE À L'USURE

Tissus et accessoires en mesure de résister à l'exposition prolongée à la poussière, aux frottements et aux lavages.

COMFORTABLE

la tecnologia dei materiali e la vestibilità dei capi garantiscono un'ottima libertà di movimento e un elevato comfort

COMFORTABLE

the technology of the materials and the wearability of the garments guarantee excellent freedom of movement and high comfort

COMFORTABLE

la technologie des matériaux et la portabilité des vêtements garantissent une excellente liberté de mouvement et un grand confort

HIGH DURABILITY

la costruzione del capo e la tipologia dei tessuti utilizzati, che resistono a lavaggi ad alte temperature, garantiscono lunga durata

HIGH DURABILITY

the construction of the garment and the type of fabrics used, which resist washings at high temperatures, guarantee long life

HIGH DURABILITY

la construction du vêtement et le type de tissus utilisés, qui résistent aux lavages à hautes températures, garantissent une longue durée de vie

ISOLAMENTO TERMICO

Utilizzo di materiali ad alto potere isolante, comprimibili per ridurre l'ingombro e garantire libertà di movimento. Attenzione ai dettagli: colli e cappucci imbottiti, fodere in fleece, patelette sotto le zip centrali, regolazioni con coulisse.

THERMAL INSULATION

Made with materials with high insulating power, compressible to reduce volume and avoid hindering movement. Attention to the details : padded neck or hood, fleece lining, flap under the central zipper, drawstring adjustments.

ISOLATION THERMIQUE

Construit avec des matériaux à haute pouvoir isolant, compressibles pour réduire l'encombrement et éviter de limiter les mouvements. Attention aux détails : col ou capuche matelassés, doublures en polaire, rabat sous les zip centrales, réglage à coulisse.

IDROREPELLENZA

Finissaggio all'esterno del tessuto per far scivolare l'acqua in superficie.

WATER REPELLENT

Outside fabric finishing to make the water slide on the surface.

HYDROFUGE

Finissage à l'extérieur du tissu pour faire glisser l'eau sur la surface.

RESISTENZA ALL'ACQUA

Finissaggi impermeabili e traspiranti all'interno del tessuto e finissaggio "water repellent" all'esterno. Capi con cappuccio e polsini regolabili, cerniere impermeabili, patelette, cuciture termonastrate.

WATER RESISTANCE

Waterproof and breathable finishings on the reverse side and external "water repellent" finishing. Garments with adjustable hood and cuffs, waterproof zipper, flaps, seams covered by tape.

RÉSISTANCE À L'EAU

Finissages à revers imperméables et respirants et finissage "water repellent" extérieur. Vêtements avec capuche e polsini réglables, fermetures imperméables, rabats, coutures recouvertes d'une bande sur le reverse.

RESISTENZA AL VENTO

Tessuti ad alta densità per contrastare la penetrazione del vento, spesso combinati con spalmatura di protezione. Capi con cappucci e polsi regolabili, collo alto e regolazione al fondo.

WIND RESISTANCE

High density fabrics to fight wind penetration, often combined with a protective coating. Garments with adjustable hood and cuffs, high collar and adjustment at the bottom.

RÉSISTANCE AU VENT

Haute densité des files pour combattre la pénétration du vent, souvent assortie de l'application d'une enduction. Vêtements avec capuche e polsini réglables, col montant, réglage de l'ourlet au bas.

TRASPIRABILITÀ

Il capo indossato a contatto pelle (Underwear) è la base del sistema dell'abbigliamento a strati, da cui dipende l'efficacia della trasmissione del vapore generato dalla sudorazione verso l'esterno, limitando la sensazione di umidità sul corpo e la condensa all'interno degli indumenti.

BREATHABILITY

The garment worn in contact with the skin (underwear) is the foundation of the layered clothing system, on which the outward transmission efficiency of the vapour generated by perspiration depends, limiting the feeling of dampness and condensation inside clothing.

RESPIRABILITÉ

Les sous-vêtements (Underwear) sont la base du système de l'habillement par couches dont dépend l'efficacité de la transmission de la vapeur produite par la transpiration vers l'extérieur, limitant la sensation d'humidité sur le corps et la condensation à l'intérieur des vêtements.

THERMIC

Abbigliamento elasticizzato dalle forme avvolgenti. Si adatta perfettamente all'anatomia del corpo facilitando i movimenti. Ottimizza la traspirazione lasciando la pelle asciutta e alla temperatura ottimale. L'assenza di cuciture assicura comfort senza costrizione.

Stretch clothing with wraparound shapes. It fits perfectly to the body and guarantees ease of movement. Optimizes breathability leaving dry skin and at the right temperature. The absence of seams ensures high comfort without constraint.

Vêtements élastiques avec des formes enveloppantes. Ils s'adaptent parfaitement à l'anatomie du corps en facilitant les mouvements. Favorise la respirabilité en laissant la peau sèche et à la température idéale. L'absence de coutures assure un confort sans constrictions.
